

TECHNICAL DATA SHEET

CN371

Reactive Amine Cointiator

DESCRIPTION

CN371 is a difunctional amine cointiator which, when used in conjunction with a photosensitizer such as benzophenone, promotes rapid curing under UV light. Additional benefits include reduced odors, both at press side and in the cured film, and reduced blooming.

LIQUID PROPERTIES

Appearance	Clear liquid
Functionality	2
Color (Gd)	4
Viscosity at 25°C (mPa.s or cPs)	1488
Amine Value (mgKOH/g)	136

PRODUCT PERFORMANCE

SUGGESTED APPLICATIONS

Flexographic inks
Inkjet inks
Overprint varnishes
Screen inks
Wood coatings

SHELF LIFE

Store in the original, closed container in a dry, cool (<45°C) and well-ventilated place. Keep away from frost and heat (open flames, hot surfaces and sources of ignition) sources. Typical shelf-life is 6 months from delivery date for unopened containers. In cases where product sampling is required to carry out incoming quality tests, shelf-life should be maintained beyond opening, provided that it is tightly closed immediately after and that contamination with foreign bodies is avoided. Inhibitors have been added to enhance storage stability. They require the presence of air in the container in order to improve their efficiency. Keep stabilizer levels constant to avoid explosive polymerization. An air space is required above the liquid in all containers

STORAGE

See SDS for Storage Considerations
