

## TECHNICAL DATA SHEET

# SARBIO® 7106

## Acrylated Linseed Oil Oligomer

### DESCRIPTION

SARBIO® 7106 is an acrylated vegetable oil oligomer developed for energy-curable ink and pigmented coating systems. It imparts hydrophobicity, good flow, and pigment dispersability to litho or offset inks.

Biobased feedstock

### SHELF LIFE

Store in the original, closed container in a dry, cool (<45°C) and well-ventilated place. Keep away from frost and heat (open flames, hot surfaces and sources of ignition) sources. Typical shelf-life is 6 months from delivery date for unopened containers. In cases where product sampling is required to carry out incoming quality tests, shelf-life should be maintained beyond opening, provided that it is tightly closed immediately after and that contamination with foreign bodies is avoided. Inhibitors have been added to enhance storage stability. They require the presence of air in the container in order to improve their efficiency. Keep stabilizer levels constant to avoid explosive polymerization. An air space is required above the liquid in all containers
