

TECHNICAL DATA SHEET

SR563

Propoxylated (2) Hexanediol diacrylate

DESCRIPTION

SR563 is a monomer that offers reduced skin irritation and improved flexibility over hexanediol diacrylate.

SHELF LIFE

Store in the original, closed container in a dry, cool (<45°C) and well-ventilated place. Keep away from frost and heat (open flames, hot surfaces and sources of ignition) sources. Typical shelf-life is 6 months from delivery date for unopened containers. In cases where product sampling is required to carry out incoming quality tests, shelf-life should be maintained beyond opening, provided that it is tightly closed immediately after and that contamination with foreign bodies is avoided. Inhibitors have been added to enhance storage stability. They require the presence of air in the container in order to improve their efficiency. Keep stabilizer levels constant to avoid explosive polymerization. An air space is required above the liquid in all containers

STORAGE

See SDS for Storage Considerations

HEALTH AND SAFETY

See SDS for Health & Safety Considerations

LIQUID PROPERTIES

Appearance Clear liquid
Functionality 2
Color (Pt/Co or APHA) <125
Viscosity at 25°C (mPa.s or cPs) 20
Density at 25°C (g/mL) 1.013
Molecular Weight (g/mol) 342
Refractive Index at 25°C 1.454

CURED PROPERTIES

Tg (°C), by DSC

PRODUCT PERFORMANCE

Moisture Resistance Shrinkage Wood Adhesion Metal Adhesion Flexibility Pigment Wetting Weatherability Corrosion Resistance

SUGGESTED APPLICATIONS

Flexographic inks Inkjet inks Metal coatings Offset inks Polymer synthesis Screen inks
