

## TECHNICAL DATA SHEET

# CN9021

## Aliphatic Urethane Acrylate Oligomer

#### DESCRIPTION

CN9021 has been developed for UV/EB-cured laminating and pressure-sensitive adhesives. CN9021 imparts excellent adhesion, flexibility, and water resistance to laminating and pressure-sensitive adhesive formulations - especially those for glass.

Superior weathering performance

## **SHELF LIFE**

Store in the original, closed container in a dry, cool (<45°C) and well-ventilated place. Keep away from frost and heat (open flames, hot surfaces and sources of ignition) sources. Typical shelf-life is 6 months from delivery date for unopened containers. In cases where product sampling is required to carry out incoming quality tests, shelf-life should be maintained beyond opening, provided that it is tightly closed immediately after and that contamination with foreign bodies is avoided. Inhibitors have been added to enhance storage stability. They require the presence of air in the container in order to improve their efficiency. Keep stabilizer levels constant to avoid explosive polymerization. An air space is required above the liquid in all containers
